

An aerial photograph showing a vast residential area completely inundated with floodwater. The water is a murky, brownish-tan color, reaching up to the roofs of many houses and surrounding the trees. The houses are densely packed, with various roof colors like brown, grey, and blue visible above the water. Large green trees are scattered throughout the neighborhood, their lower branches submerged. The overall scene depicts a severe flooding event in a suburban or urban setting. In the bottom right corner, there is a copyright notice: "© 2016 NOLA.com | The Times-Picayune".

Operational Period:

Starting: 08:00 / 23 Aug 16

Ending: 08:00 / 24 Aug 16

| | | | | | |
|---|---|--|---|---|--|
| 1. Incident Name 2016 August Flood | 2. Operational Period Date / Time From: 08/23/2016 / 08:00 To: 08/24/2016 / 08:00 | INCIDENT OBJECTIVES ICS 202 | | | |
| 3. Incident Objective(s) 1. Ensure health and safety of responders and the public by conducting operations in accordance with the approved site safety plan. 2. Monitor debris activities at landfills 3. Continue to respond to complaints/concerns from citizens | | | | | |
| 4. Operational Period Command Emphasis (Priorities, Key Decisions for Operational Period) 1. Complete detailed 214s as required, but it is not necessary to submit them to IC at the end of every day. 2. Develop plan for appropriate ICP staff; evaluate and provide appropriate "right sizing" of the organization to correlate with operational needs. 3. Reaching out to FEMA/ EPA for assistance with household hazardous waste, white goods, and orphan containers. 4. Do not put any photographs of flooding and damage on <u>ANY</u> type of social media. 5. The Incident Command main phone number is (225) 219-1221 | | | | | |
| 5. Weather Forecast Baton Rouge Area: Tuesday, August 23 - 40% chance of scattered thunderstorms High temp 91 Wednesday, August 24 - 60% chance of scattered thunderstorms High temp 92 | | | | | |
| 6. Safety Objectives 1. Staph infections – due to recent outbreak of severe bacterial infections, all persistent rashes and/or swelling around cuts/abrasions must be reported to the Site Safety Officer. 2. Driving – Be aware of when driving since contractors are coming here to work from other states that are not familiar with Louisiana area roadways. Also be aware that in many areas, red lights are not functioning. Please use appropriate caution when approaching an intersection where this is the case. 3. Road Hazards - Trucks are loaded with debris and may not have the appropriate covering to prevent falling out during transport. Be alert, keep your distances, follow the laws, and drive safely. 4. Debris Hazards - Use a tool first when disturbing debris or overturning containers, and never use your hands. If needed, wear snake chaps during any operation with the potential to encounter snakes. If bitten or stung, seek medical assistance immediately, even if you're certain it wasn't a poisonous species. 5. Reporting Injuries – it is very crucial to report all injuries to your Supervisor or Safety Officer. | | | | | |

| IAP SAFETY ANALYSIS | ICS 215a |
| <p>The Department is transitioning from search & rescue mode to recovery. During the current operational period the focus will be on Rapid Needs Assessment (RNA), water reconnaissance, and telephone notifications. Personal operating in the field should be aware of ongoing high water risks in many areas. Also, the potential exists for contact with dangerous wildlife (poisonous snakes, alligators, fire ants, etc.) Typical afternoon thunderstorms have the potential for frequent cloud to ground lighting, seek shelter with approaching storms. All staff has Stop Work Authority if the work situation presents unnecessary or undue hazards. As always, report all injuries to the Safety Officer.</p> | |

Safety Message

2016 August Flood

Operational Period: 08/23/2016/ 0800
08/24/2016 / 0800

Major Hazards and Risk:

Defensive Driving, Road Washouts, Debris/Sampling, Electrical hazards, Security, Fatigue, PPE, Heat, Animals

Defensive Driving - Be alert. Drive with extreme caution. "Watch out for couple of things: 1) twisted or bent stop signs and then other drivers miss seeing the downed signs at intersections; 2) debris on the road like leaning electrical poles and downed power lines. Be aware of service people working in the parishes while driving roads and highways. Be aware of road grade stability that was affected by flooding and roadway washouts.

Debris/ Sampling: Wear Appropriate PPE to address the hazard issues while entering and exiting debris fields. Be aware of hollow spaces in debris fields. Remember you can get lacerations from tree trimming. Be aware of potential conditions for fire and explosions. If you are on landfill assessment duty, be sure to check the condition of your vehicles before you leave the facility and get back on the highway.

Fatigue: Know your limitations. Watch your buddy. He/She are just as busy as you are. Accidents happen when personnel are fatigued and their thoughts processes are muddled. Physical and mental reaction times become slower. When you are tired and rushing to finish a job, is when a lot of trips, slips, and falls occur. With a loss of power to a lot of homes, people are doing without sleep. Are you one of them?

PPE: Personal protective equipment is the first line of defense against injury or potential exposures. All field work requires the minimum of Level D protection.

Wild Animals – Please beware that wild animals and insects are being displaced by raising flood waters. These animals are seeking new homes and food. So be aware of snakes, alligators, black bear, raccoon, possums, armadillos, deer, ants, and other stinging insects.

Mosquitoes: WEAR INSECT REPELLANT.

Hydrate/Heat: Remember to drink plenty of fluids. Bring something to drink since many facilities have suffered damage and are not open or are without power at this time. Apply sunscreen to exposed skin during prolonged outdoor activities.

Weather Forecast: Heat and heat index listed below in red is for CRO.

Tuesday August 23: Mostly cloudy in the morning with scattered thunderstorms developing later in the day. High 91F. Winds light and variable. Chance of rain 40%.

Wednesday August 24: Scattered showers and thunderstorms. High 92F. Winds light and variable. Chance of rain 60%.

There are some parishes still experiencing flooding from this event. Please be aware of driving conditions for yourself and the other driver who could hit you if they missed seeing the downed or twisted STOP sign at that intersection. You could be totally right and have the right away and still end up in the hospital. So, protect yourself and those riding with you.

Do not drive cars through flooded areas. Remember....Two feet of rushing water can carry away most vehicles including trucks/pickups. Turn around and don't drown.

Tommy Doran
LDEQ Safety Officer
